

# Swinglink® Bucket Conveyors

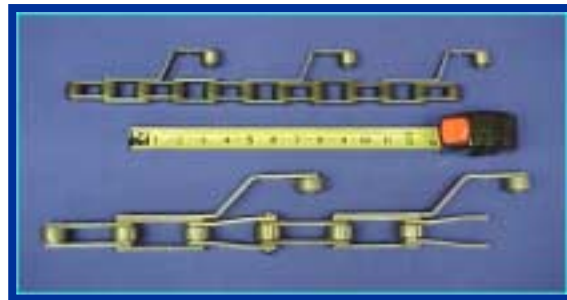

## Chains:

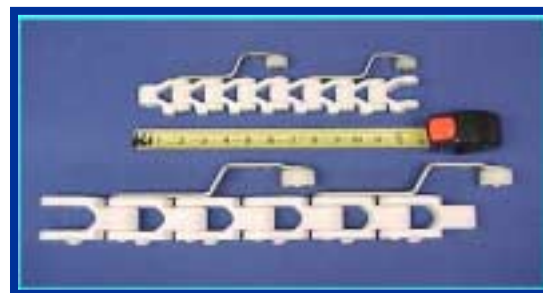

## Features & Benefits:

- The plastic chain is unique to Gough Econ bucket elevators. It has no rollers and runs on a plastic track. Because of this design, the chain is completely washable and needs no lubrication.

- 4,000-24,000 lbf tensile loading: stronger chain = longer life.
- Chain design is a true conveyor chain with oversized rollers. Unlike precision chains, Gough chains have larger clearance in the rollers to be more forgiving in heavy-duty applications and prevent product trapping and contamination.

- Chains available in Acetal plastic, carbon steel and stainless steel. Variety of materials offers appropriate strength and sanitation requirements for specific application.
